

## How do I Edit an Operator's Certification?

### To edit an Operator's certification:

1. Click on the System View **Active Certifications** which will include the Device Type and Certification Expiration columns by default (the "collapse certifications" feature will be disabled).

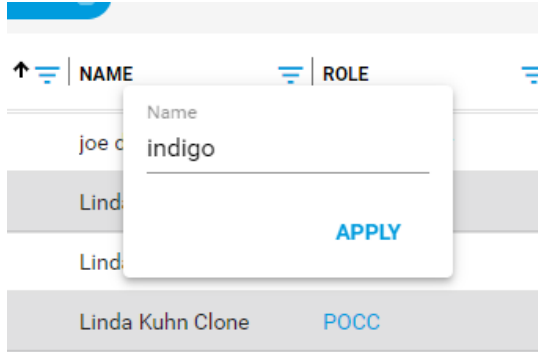

2. Search for a specific operator using either one of the following methods:
  - a. **Operator Search Field:**

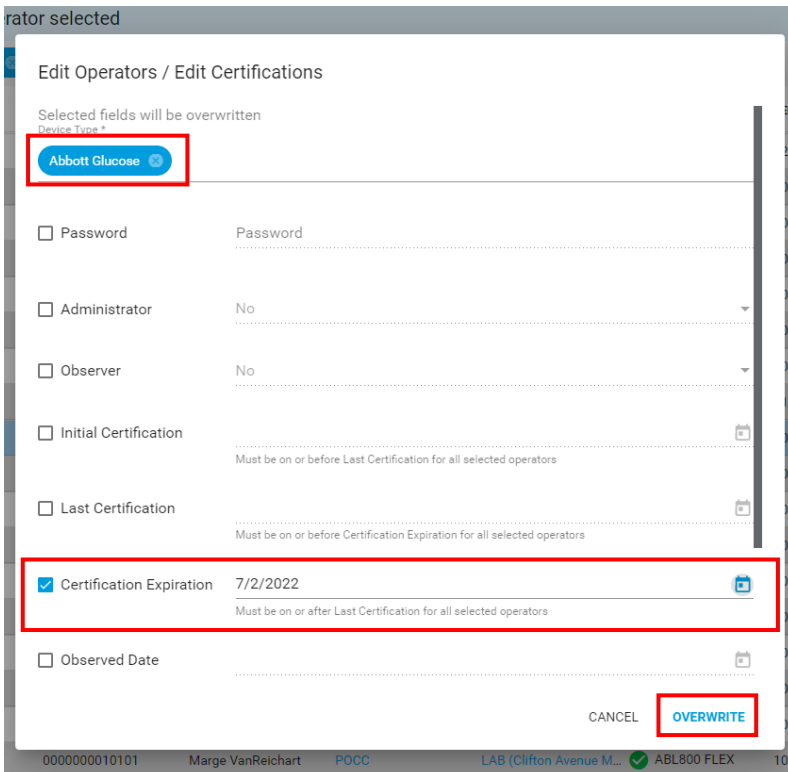

# How do I Edit an Operator's Certification?

## b. Filter the **Name** or **ID Column**

3. Select the **Operator**
4. Use the right mouse click function to select **Edit Certification** from the dropdown menu
5. A new window will open
6. Search for the device type
7. Check the box next to the field/s you would like to edit then click **OVERWRITE** and the operator's certification will be updated:

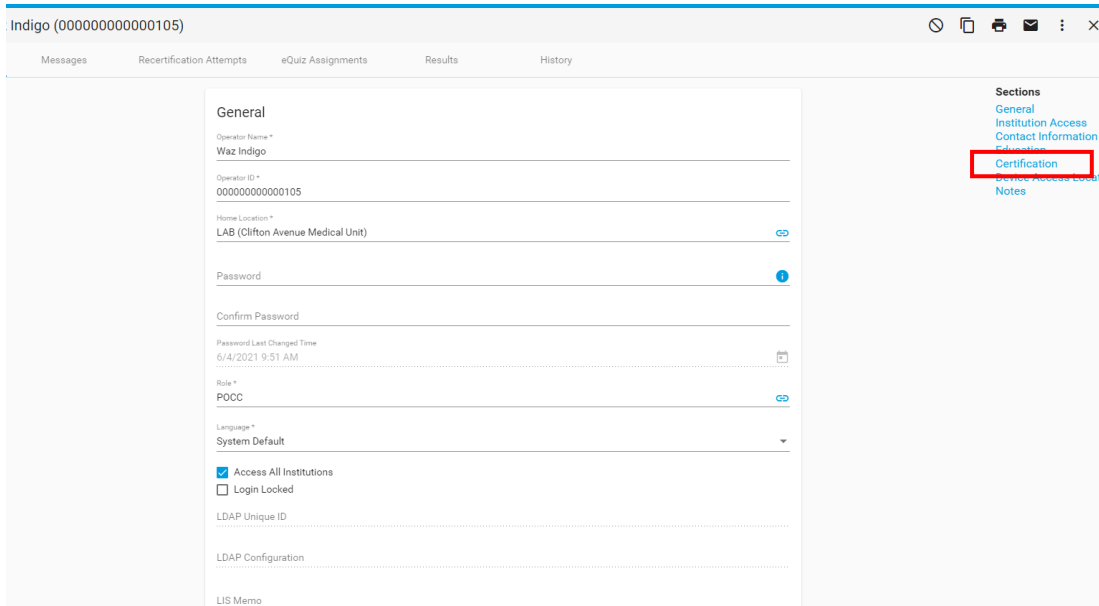

## How do I Edit an Operator's Certification?

Alternatively, you can edit an Operator's certification directly from the Operator details page:

1. Double click on an Operator
2. Click on the **Certification** section:

3. Click the **edit**  button next to the Device Type
4. Update the certification, then click **OK**
5. Click the **Save**  button and the operator will be updated
