

CONNECTIVITY FOR POINT-OF-CARE TESTING

RALS™ MANUAL TEST ENTRY

RALS™ Manual Test Entry (RALS MTE) is a feature that enables you to enter manual or lateral-flow test results directly into RALS and then send to your LIS. This means all tests done at the point of care can now reside in the RALS database for viewing, reporting and more!

Manual tests can be configured using the preexisting Manual Test Setup page enabling results to be directly into the RALS system.

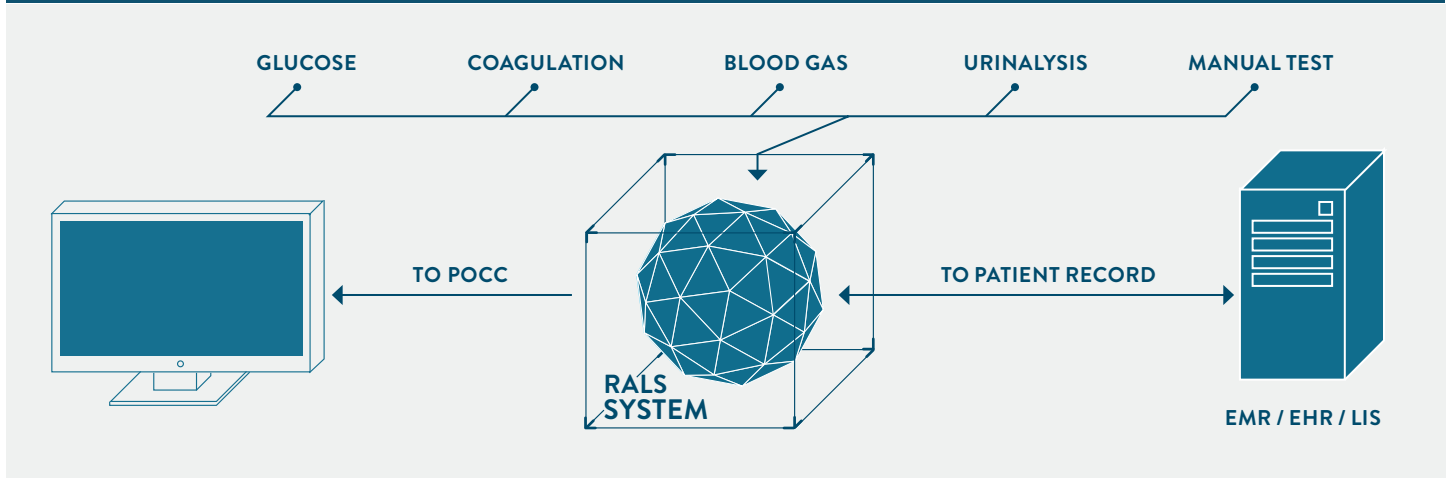

RALS MTE supports a wide range of test types. A listing of test types is shown on the reverse side of this sheet.
