

DEVICE CONNECTIVITY FOR
POINT-OF-CARE TESTING

RALS™ DEVICE INTERFACING

The Cholestech LDX™ System provides efficient and economical point-of-care testing for cholesterol and related lipids. When used in a hospital or physician office lab, the connectivity between the RALS™ system and the meter provides users with numerous benefits.

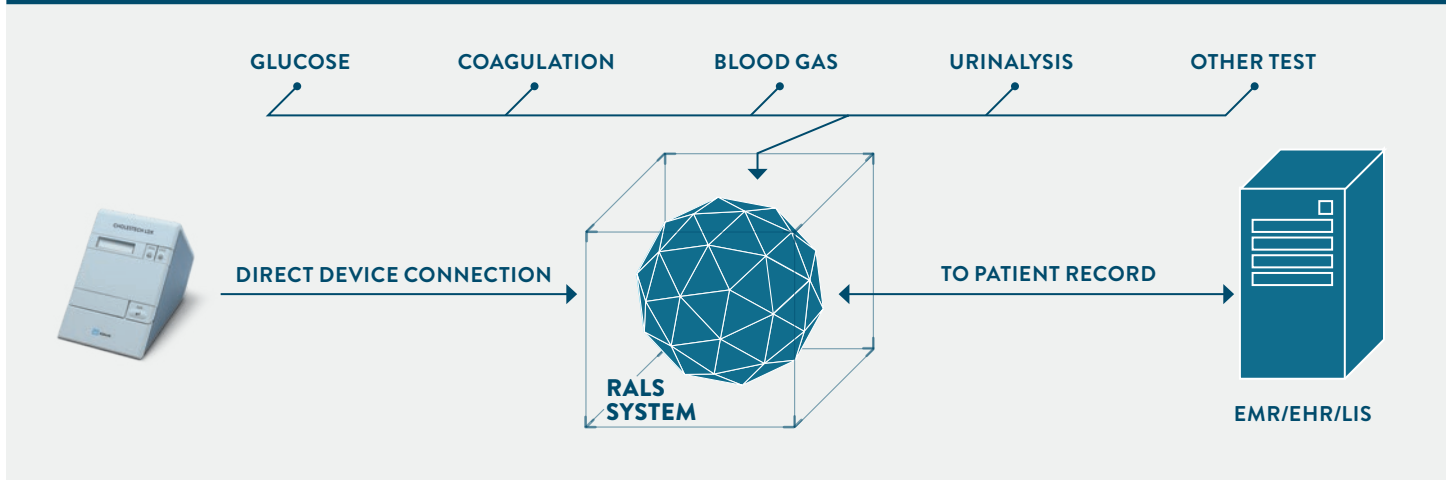

Connectivity by the RALS System enables users to:

- Centralize all test results into the RALS system
- Transfer results to an EMR/EHR/LIS
- Email results to operators and managers
- Access and manage misidentified patient and out-of-range quality control (QC) results
- Monitor and manage operator certifications

RALS™ | Cholestech LDX™ System Connectivity

HOSPITAL/FACILITY/INSTITUTION NETWORK

DATA FLOW

Results are transmitted to the RALS™ system and held on the results management page for additional information to be added. Results are then evaluated and sent directly to the EHR or held on the flagged results page for review.

DIRECT-TO-DEVICE INTERFACING

The Cholestech LDX transfers a wide range of data to RALS, including:

RESULTS

- Patient, QC, Optics Check

TEST TYPES

- Total Cholesterol (TC), TC-Glucose, TC-HDL, TC-HDL-CGL, Lipids

UNI-DIRECTIONAL COMMUNICATION

From Device to RALS System:

- Results (Patient, QC, Optics Check)

HOW THE DEVICE CONNECTS

- RALS Remote Connect — a computer software application
- RALS Dataport

AVAILABLE REPORTS FROM THE RALS SYSTEM

- Anomalous Results by Device
- Anomalous Results by Operator
- Operator Statistics
- Operator Pending Recertification Range
- Operator Pending Recertification Date
- Operators with No Certification
- Device Statistics Summary
- Patient Results by Operator
- Patient Results by Patient
- LIS Statistics by Location
- LIS Statistics by Operator
- Institution Statistics
- Location Statistics
- RALS Device Log
- Workload Summary
- Test Materials
- Levey-Jennings
